

## *Flower Wreath for Faire Maiden's Hair*

Presented by Bev Robertson

### Supplies:

Floral wire gauge 30 to 24

Woodland Scenic Foliage - Light or med. Green

Flowers

Green or brown acrylic paint (optional)

Cut off a piece of wire to fit around your doll's head plus a couple of inches. If you wish, paint it with a brown or green color. Paint by using a dab of paint on a rag and running it the length of the wire. Let dry.

Bend the wire in a nice round shape to fit the head. I bent mine around a syringe that was the right size. You don't need to use anything to bend the wire except your fingers. I did it because sometimes I'm not careful enough!

Take the the foliage material and glue little bits to the wreath.. If you wish wrap with silk ribbon.

Now add the flowers. They can be Woodland-Scenic foam, dried flowers, paper flowers, silk flowers.

Let dry! If you are using dried flowers, I'd recommend spring the wreath with Acrylic matte spray or cheap hair spray, to keep the dried flowers in one piece.
