

# Faberge Egg PDF

by JIL

Greetings! My name is Sally S and I live on the OTHER side of the tracks.(the good times trailer park that is) Though my means are simple, my taste isn't.

I've come up with a CUTE Easter Egg Project for us fun trailer members.

To make your own pretty Faux Faberge Egg.... Simply follow the photos above to create the simple egg, and then paint, decorate, glaze, rhinestone or bead as desired.

## DIRECTIONS:

1. Take an earring back with long post and slide the appropriate curved finding downward to to make pretty base.

2. Now take a round piece of colored fimo/sculpy (the metallic kind is cool), shape in an egg and slide down earring post as shown. Lastly press into top and little jewelry finding and bake entire egg. When cool, secure/glue the jewelry finding to top.

## Decoration HINTS\*\*\*\*

-before fimo egg is baked, press tiny no hole beads into egg, then bake. This goes for rhinestones as well.

-carve a little hole in egg ... and put your tiniest little dolly inside for a real easter egg scene

-after baking, and gluing on beads, rhinestones ... cover the entire egg with clear fingernail polish. This adds a high glaze to egg and gives it the nice faux sheen.

- after baking egg and letting cool - paint the EGG itself with a colored/metallic fingernail polish

ENJOY and send me photos of what you came up with. JIL (the dognanny@gmail.com)
